Subject: Welcome! / Incompatible Transfer Procedure

Congratulations! You have completed all necessary requirements for Reintegration!

However, we regret to inform you that the scheduled Cleansing Operation for your co-applicant, M-102323, was fatally unsuccessful.

As you know, such Cleansing Operations are vital for re-integration of any Pau citizens back into the Comm-Unity, if Earth Prime is to retain its long-established social cohesiveness.

Of course, there's always a risk with such integration procedures. Your cases in particular, as you are three generations deviant from the Great Fork, involved significant risk.

In considering your next steps, we want to convey our understanding of the difficult social stigmas you faced on Pau as a result of your genotype. It is precisely this sort of social divisiveness that makes the enforcement of our Homogeneity Policies so important.

Perhaps you will be consoled to learn that we have determined your genotype to be suitable for re-integration into the Prime Matching Algorithm. If your lottery number is chosen within your viable mating years, you will therefore qualify to participate in the Generational Harvest.

Further information about preparing for Harvest, and for other steps required to smooth your transition back into Prime Society, will be sent to your new address.

Yours Sincerely,
The Algorithm
